## EXPERIENCE

### OsonSMS

- Co-founder & Full Stack Developer

Tajikistan  
Jan. 2016 - Present

PHP Python MySQL Laravel Git Docker DigitalOcean REST API Vue.js HTML5 CSS3 Microservices

- Developed a web application [OsonSMS](#) using a popular web-framework Laravel, which allows to keep track of large amounts of customers easily, create SMS text using templates and variables which are then replaced with appropriate attributes of each customer to whom SMS is being sent. Every day round 500 users work and send SMS using this web application.
- Designed and developed a REST API for sending SMS which sends around 100.000 SMS per day.

### Neksigol Group

- Team Lead & Senior Full Stack Developer

Tajikistan  
Jan. 2012 - Present

Team Lead PHP Laravel Python Kotlin JavaScript MySQL nginx Vue.js HTML5 DigitalOcean Microservices

- Team lead of group of software engineers
- Developed web applications and mobile applications for the agricultural sector. List of IT tools for agribusiness that was developed can be found here [AgroSpace](#)
- Developed web-apps using a popular web-framework Laravel for International Organizations, such as USAID, UN, World Bank, Helvetas (Switzerland), GIZ (Germany), etc. using LEMP
- Overall number of users of these IT tools is around 200.000

### University of Santiago de Compostela, Department of Electronic Engineering

- Student-Researcher & Software Developer

Spain  
Apr. 2008 - Nov. 2011

Python R Statistics Machine Learning Clustering Big Data Bayesian Classifier Clusterization Probabilistic models

- Developed a web-based authoring tool where a recommendation algorithm suggested relevant collaborative teams of teachers to the coordinators of the courses or units of learning.
- Developed a model that tried to predict grades of students by means of a set of relevant student's variables.

### Technological University of Tajikistan, Department of Information Technologies

- Lecturer at Programming and Computer Science Courses

Tajikistan  
Sep. 2004 - Mar. 2008

PHP MySQL Javascript HTML5 OOP
