SUMMARY

Experienced software engineer with expertise in Node.js, React, Microservices, SQL, and AWS seeking a challenging role in a service-based industry partnering with big tech organizations to work on software-based solutions with scale and impact. Skilled in creating scalable, reliable, and maintainable software solutions.

SKILLS

- Node.js, React,
- AWS, Adobe Experience Manager (AEM), MySQL
- Object Oriented Design, Software Design Patterns

EXPERIENCE

Software Engineer DL Networks September 2022 – Present

- Developed and maintained a microservice-based system using Node.js and React
- Developed and optimized a RESTful API using Node.js, reducing response times by 50% and improving overall system performance
- Designed and implemented a real-time chat feature using WebSockets and AWS SNS, resulting in a more engaging user experience
- Improved the application's scalability by implementing AWS Elastic Load Balancers and auto-scaling groups
- Implemented AWS Lambda functions to automate various processes, saving the company 10 hours of manual work per week

Web Developer BlackBerry January 2022 – August 2022

- Developed and maintained web applications using Node.js, React, and Adobe Experience Manager (AEM)
- Collaborated with architects, QA engineers, and other functional teams on agile development efforts
- Implemented functional and architectural components defined by product management and architects
- Participated in design and implementation of components that integrated with internal and external systems

Canadian International Sport &

Web Developer Educational Center March 2021 – December 2021

- Developed and maintained a React-based front-end application that supported thousands of users
- Implemented a caching layer using Redis to improve application performance and reduce database load
- Conducted code reviews and provided feedback to team members

PROJECTS AND ACHIEVEMENTS

- Developed a hackathon organization web application using React, Node.js and AWS with user authentication, event creation, event management, project submission and review, communication and analytics
- Developed a Java-based web application for managing inventory and orders
- Achieved top 3 positions in 5 hackathons, demonstrating consistent innovation and problem-solving skills

EDUCATION

Ottawa, ON Algonquin College January 2021 – December 2022

- Diploma in Computer Programming, December 2022. GPA: 3.31

CERTIFICATES

- AWS Certified Developer – Associate
