## EDUCATION

---

**Belarusian State University, Bachelors Degree**

*Faculty of Radiophysics and Computer Technologies*

Minsk, Belarus

*Aug. 2017 – May 2021*

## EXPERIENCE

---

**Software Engineer**

*Netcracker*

September 2019 – December 2019

*Minsk, Belarus*

- Design and develop business logic
- Decompose stories
- Implement GraphQL schema and queries
- Writing unit tests, integration tests using JUnit
- Extend microservices with new business logic
- Cloud deployment
- Technical improvement of performance and stability
- Issues investigation
- Cloud microservices support
- Took part in production

## PROJECTS

---

**Movie Swipe** | *Telegram API, Spring Boot, Java 17, MongoDB, Redis, GitLab*

March 2023 – Present

- Developed telegram bot which helps to find movie tonight
- Develop REST API to manage rooms, movies, matches
- Implement TMDB integration to fetch movies according to provided filters
- Develop spring telegram bot dependency to start bots easily
- Implement telegram bot rooms operations: create, join, choose filters logic
- Implement telegram bot movies operations: view, like, dislike
- Implement telegram bot matches operations: view, receive
- Implement membership restrictions based on user subscription status
- Implement GitLab CI/CD for building artifact when push and delivering it to Heroku instantly
- Used Redis for storing telegram message ids for its future edit/remove

**Charge ME** | *Spring Boot, Java 8, Maven, PostgreSQL, Git, Angular 8*

September 2019 – December 2019

- Developed a service to store information about user subscriptions
- Designed and developed DB architecture for storing subscription information
- Implemented backend API to store, view, edit, charge subscriptions
- Implemented web application on Angular to interact with end user
- Secure application with JWT tokens
- Implement spring security with dedicated gateway application

## TECHNICAL SKILLS

---

Java, Git, SQL, PostgreSQL, Spring, Spring Boot, Spring Security, Spring Data, Spring Batch, Apache Maven, Apache Camel, JUnit, Jira, Docker, Microservices, Consul, E-Commerce, Flyway, Postman, Jenkins, JFrog Artifactory, Openshift, Kubernetes, Cloud, Swagger, REST, GraphQL
