## EXPERIENCE

---

### Senior Business Systems Analys, Lead Analyst

Oct 2022 – Present

*KL Tech | Outsource software development*

*Vanadzor, Armenia*

- Helped to establish some of the company's internal business-processes, particularly for the analytical department, developed analytical templates for the company and defined overall approach
- Created software requirements specification for an on-going e-commerce project

### Senior Business Systems Analyst, Lead Analyst

Sep 2020 – Sep 2022

*Sberbank | Fintech, corporate lending*

*St. Petersburg, Russia*

- Researched a legacy system's database structure and SOAP APIs to understand the company's business needs
- Created data migration algorithms and data mapping rules to extract crucial business data from a legacy database
- Designed multiple REST APIs for various consumers in the bank's micro-service architecture
- Created technical specifications for the implementation of several new banking business-processes and features, such as corporate lending deal creation process
- Actively participated in the backlog planning – evaluating and prioritizing user stories, setting up deadlines
- Interviewed new applicants for analytical department jobs, provided on-boarding and guidance to new employees and assisted with the department's management in general

### Business Systems Analyst

Mar 2019 – Aug 2020

*ISS Art | Outsource software development with a focus on AI*

*Krasnoyarsk, Russia*

- Participated in over a hundred of presale stage projects, helping clients to articulate their business requirements, offering a proper technical solution and calculating its development cost estimates
- Took part in over 10 AI-focused (ML, CV, NLP) projects as an analyst, from outlining the project scope and core features to writing technical specifications and requirements, creating UI wireframes and presenting the results
- Lead a one year long mobile development project about fingerprints detection, recognition and classification; besides the usual analytical tasks, dived deep into the UI/UX subtleties and also designed a user journey that allowed to optimize the back-end calculations time and avoid bad user experience

### Business Systems Analyst and IT-support

Sep 2016 – Feb 2019

*SNMG, ex Social Networks Agency*

*Krasnoyarsk, Russia*

- Researched the company's business processes in a role of an IT support specialist
- Worked on the development of an in-house software system designed to automate the customer support pipeline in the social media
- Interviewed stakeholders (decision makers, end users) to gather and describe business requirements
- Created a detailed technical specification and user guides for the system
- Assisted with the software delivery and the manual testing

## EDUCATION

---

### Siberian State Aerospace University (SibSAU)

Krasnoyarsk, Russia
