Summary

Ambitious software developer with 4 years of experience in SaaS development (both back and front end), looking for a full-time full stack developer position. Curious of learning new skills, motivated for constant progress

Languages and technologies: C# (.NET): MVC, WCF, Web API; HTML/CSS/JavaScript; AngularJS/Angular 10; TypeScript; NgRx/RxJS; Angular Material; Docker; Unity IoC, Node.js; Java (basic knowledge); Git; TFS; SQL Server; Redis; GraphQL; PostgreSQL; Mongo DB (basic knowledge)

Work experience

Senior Full Stack Developer

05.2021 - Present

boltttech, Israel

- Created and maintained new company projects within multi tenant insurance exchange environment (e. g. new consumer flow insurance interview HQX 2.0 for Progressive - one of the biggest insurance agencies in US, modern quick quote consumer interview platform for insurance agencies in Italy)
- Worked on Angular web projects using modern technologies (NgRx/Rx.js, Angular 10) as well as backend apps (REST APIs, .NET microservices (Owin/WebAPI), Redis consumers)
- Worked on device/browser compatibility issues implementing the UI tasks according to design kits (Figma, Adobe XD)
- Involved in constant production support, investigated and solved environment related issues and delivered hot fixes
- Advised team members on features development/troubleshooting for new company projects (multi tenant insurance exchange environment), making code reviews, lead trainings for new employees, made a major contribution to internal Wiki knowledge base)

Full Stack Developer

01.2019 - 05.2021

boltttech, Israel

- Maintenance/Development of insurance agency web platform for US clients (.NET MVC, WCF, AngularJS/Angular 5), implemented complex app features (e. g. collaboration with Bind HQ™ insurance platform, AMS (US agency management system) transaction management assistant)
- Built new services/APIs by using microservices architecture (SOA) in multi-tenant (multi configuration) environment
- Took a major role in upgrading and refactoring several legacy projects (e.g. security improvements for old MVC projects, Angular JS major upgrades, migration of legacy monolith projects to a new platform (BoltX) for several clients)
- Worked in Agile environment, participated in features design, involved in all Scrum meetings

Backend Developer

12.2017 - 01.2019

SaleFreaks, Israel

- Worked on company core projects (e. g. billing service, admin dashboard, back office) using modern .NET technologies
- Implementation of integrations with foreign APIs (e. g. Intercom, PipeDrive, eBay/Amazon API)
- Constant work with databases (PostgreSQL): building complex queries for preparing reports and database management
- Maintenance of existing projects (troubleshooting, developing fixes)

Technical Support Lead

09.2017 - 12.2017

SaleFreaks, Israel

- Worked on SaleFreaks platform - leading software solution for sales process automation in e-commerce: provided service to company customers, handled technical problems with accounts, cooperated with development team on solving the issues
- Worked with bug list (bug description and revision, provided possible solutions), to-do lists (using Slack, Trello), prioritizing tasks and features, team work, servers management

Education

Software Development

04.2016 - 10.2017

Tel Ran College, Israel

- Backend development (Java, Spring, Hibernate, REST), frontend development (HTML, CSS, JS, JQuery, AngularJS, Angular 2+, Bootstrap), experience in working with databases: SQL, MongoDB and operation systems (Windows, Linux)
- Participated in final project 'IsraEzer' (development of Angular 2 website and administrator dashboard, support in server development)

Computational Linguistics M. A.

2013 - 2015

Southern Federal University, Russia

- Studied the methods of human identification by language parameters using dedicated computer software: voice recognition and analysis using computer software tools (spectrogram, vowels searching etc.);
- Foreign languages learning (German, English) in all aspects (Phonetics, Grammar. Literature etc.)
