

Backend NodeJS developer with an emphasis on database design and server-side programming. I have been working with some start-ups for the past two years, mostly building REST APIs and developing data models.

EXPERIENCE

Yamo, January, 2021 – April, 2021 as *Node.js developer (internship)*

Development of an application for controlling 3d model creation process

- Attended developing REST API modules.
- Fixed bugs and refactored source code to improve scalability.
- Contributed to implement file hosting service built on top of Amazon S3
- Gained experience and knowledge with new technologies and methodologies

Dizipro, April, 2021 – Present as *Node.js engineer*

Development of an online learning platform

- Fixed bugs and refactored source code to improve scalability.
- Developing and maintaining all server-side network components.
- Integrate server-side logic to the user-facing components built by front-end developers
- Document software development processes and prepare project reports
- Integrate application with third-party services

Tridmo, Present (part-time) as *Backend developer*

Development of a 3D marketplace web application

- Used Knex.js to build a SQL schema and developed a REST API on Express server.
- Deployed Node.js code to remote servers such as Digital Ocean.
- Collaborated with mobile and frontend engineers to develop REST API contracts and documented using Postman.
- Implemented continuous delivery using 100% declarative infrastructure and automated deployment
- Enabled incremental and reversible management of database schema by implementing schema migration using Knex.js and Node.js
- Implemented file hosting service built on top of Amazon S3

EDUCATION

- “Najot ta’lim” education center (2020) - *Full-stack web development*

LANGUAGES & TECHNOLOGIES

- JavaScript, TypeScript, NodeJS, ExpressJS, PostgreSQL, MongoDB, KnexJS, Sequelize

LANGUAGE SKILLS

- Uzbek: Native
- English: Competent
