SUMMARY

4 years of experience as a software engineer, React.js developer with a background in Node.js for backend development. I have experience in different projects, from construction management and educational platforms to ERP system integrations. I am passionate about building engaging web interfaces and actively contributing to various full-stack initiatives.

SKILLS & TECHNOLOGIES

Languages: JavaScript, HTML, CSS, SCSS, C#

Frameworks: React.js, Redux, Redux Thunk, Apollo Client, Next.js, Node.js, Koa.js, GraphQL.

Developer Tools: Browser developer tools, VSCode, Git, GitHub, Figma, JIRA.

EXPERIENCE

[SoftConstruct](#)

Nov 2022 - Present

Front-end Software Engineer

- **Responsibilities:**
 - Contribute to a new project involving client and admin sites, using React.js and Next.js frameworks.
 - Support the current React.js site, addressing bug fixes, optimizing performance, and implementing new features.
 - Handle ad-hoc development requests, showing a responsive and proactive approach to software engineering.
- **Achievements:**
 - Developed a new project with client and admin sites using React.js and Next.js.
 - Successfully resolved bugs on the existing React.js site, and improved site performance.
 - Proactively implemented new features, ensuring continuous product improvement.

[CodeInno](#)

Jun 2021 - Nov 2022

Full-stack Software Engineer

- **Responsibilities:**
 - Lead projects on educational platforms and production management systems.
 - Collaborate on cross-functional teams to define and meet project requirements.
 - Execute end-to-end development lifecycles, from project initiation to delivering MVPs.
- **Achievements:**
 - Brought projects from conception to MVP, meeting objectives and timelines.
 - Enhanced user experiences with multilingual interfaces.
 - Streamlined payment processes with secure system integration.

[Buildern](#)

Jun 2021 - Nov 2022

Full-stack Software Engineer

- **Responsibilities:**
 - Engage in various tasks across different sections of the Buildern project.
 - Collaborate with team members on cross-functional projects.
 - Participate in code reviews and discussions, ensuring code quality a cross-functional.
- **Achievements:**
 - Adapted to the diverse and dynamic nature of the Buildern project, contributing effectively to different parts of the software.
 - Collaborated successfully within a cross-functional team, ensuring seamless integration of diverse project components.
 - Demonstrated flexibility by taking on random tasks, and showcasing problem-solving skills across various project domains.
 - Contributed to maintaining high coding standards through active participation in code reviews.

[Bever](#)

Dec 2019 - Jun 2021

JavaScript Developer

- improved the user experience by building innovative layers on top of the core Dynamics 365 interface. This initiative was aimed at optimizing the user experience and significantly improving the overall usability of the system.
- Implemented JavaScript solutions to address unique challenges and optimize the performance of the application. This included overcoming obstacles related to data visualization, user input validation, and real-time updates.

EDUCATION

[Code School](#)

Jul 2019 - Nov 2019 Armenia

Completed Front End Programming courses with a focus on **JavaScript, HTML, CSS**.

[Microsoft Innovation Center Armenia](#)

Jul 2019 - Nov 2019 Armenia

Explored **C# .Net** programming through comprehensive courses at Microsoft Innovation Center Armenia.
