"A person can do everything and even more."

## Summary

---

Looking for a work in company with an agile mindset and flat-hierarchy values. Capable to design and maintain mission critical services. Besides of developing the frontend part, if possible, I would be happy to work with the server side, also creation, revision, and improvement the application architecture.

## Education

---

**BSEU (Belorussian State Economics University)**

Minsk, Belarus

B.S. IN MARKETING AND LOGISTICS

Sep. 2018 - Jun. 2022

## Work Experience

---

**P.E. «NEURO SOFT»**

Minsk, Belarus

REACT JS DEVELOPER

Oct. 2021 - present

- Created a system for working with documents based on the Ckeditor library. It includes the logic for working with documents and ideas, the history of changes, as well as the logic of the merge when editing a document by several users at the same time. As a result, the company received an additional conductor between the sources of generating ideas, a source of tasks scope.

- Created a report management system consisting of personal user and project reports. Based on this system, I created a second system for collecting meta information from users. The metadata contained information about user actions within the first system. As a result, the company has an opportunity to analyze users, received an additional way to monetize the platform.

- Apart from architecting and developing, was tightly involved in management meetings, discussing business problems, collective and personal solving tasks, planning and implementation of infrastructure modernization. In general, resource management has been optimized and tasks have been solved with high efficiency.
