### About me

I am a beginner frontend developer. I am looking for my first job. I could write that I am purposeful and work well in a team, but everyone writes that...

Actually, I want to become a qualified specialist and learn to write clean code.

Level of English – intermediate.

### Education

Kottans front-end courses 2022.

Odesa Polytechnic National University  
September 2009 - June 2013 Mechanical Engineering.  
Bachelor degree.

### Experience

My previous experience is not related to IT technologies. I had a small food delivery business, but it had to be closed because of the war. I have several pet projects from courses. I'm also learning React. You can see my projects on Github.

### Skills

- HTML - CSS
- JS - React
- RestAPI - Node.js
- Git - SASS
- Figma

I'm not saying that I'm a pro in all of the above, but I understand how it all works.
