Education

University of Westminster
Bachelors of Science

London, United Kingdom
Sep 2019 - July 2023

Experience

iOS Engineer
Uzum Technologies

Feb 2023 - Present
Tashkent, Uzbekistan

- Rewrote and optimized key modules such as P2P transfers and Transactions History using the MVVM design pattern, resulting in a more maintainable codebase and a significant reduction in random bugs.
- Conducted a thorough code review and refactored code to fix memory management issues, significantly decreasing app crashes and improving overall performance.
- Implemented engaging animations in the My Home/Payments module using Swift and UIKit, improving user interaction and satisfaction, as reflected in positive user feedback and increased usage metrics.
- Conducted comprehensive code reviews and refactored 88% of legacy code to align with modern development practices, resulting in enhanced code quality and maintainability.

iOS Engineer
DoSport

Nov 2021 - Jan 2023
Moscow, Russia (remotely)

- Delivered a fully functional beta-app from scratch within 7 months with a team, allowing the product owner to secure £80,000 in funding from investors.
- Designed a scalable app structure using Clean Swift for Sports startup, ensuring maintainability and ease of future enhancements.
- Managed small groups of coworkers and mentored junior developers, fostering team productivity and ensuring high-quality deliverables.
- Contributed to UX/UI design through active collaboration with stakeholders, improving user engagement and satisfaction.

Projects

Yoldosh | *Java, Swift, Spring Boot, SwiftUI, Kotlin, RESTful API, MySQL, Git*

Oct 2023 - Present

- Developing a robust backend using Spring Boot and MySQL for complex booking and ride management.
- Implemented secure user authentication with Firebase OTP and integrated real-time GPS tracking.
- Designed wireframes using Figma, and implementing iOS and Android in SwiftUI and Jetpack Compose.
- Integrating CI/CD pipeline for iOS/Android with GitHub Action.

Debt Tracker | *Swift, UIKit, RESTful API, CoreData, Git*

Oct 2023 - Jan 2024

- Developed a debt tracking iOS App with CoreData for offline access.
- Created an intuitive user interface using UIKit and implemented efficient search capabilities.
- Conducted thorough testing, including unit using XCTest with 75% coverage, ensuring app reliability.
- Successfully launched on the App Store for free.

Technical Skills

Swift, UIKit, SwiftUI, iOS Development, Client-server applications, RESTful api, Concurrency, Swift's async/await, CoreData, Networking. GCD, Alamofire, Xcode, CI/CD, XCTest, Unit Testing, Auto Testing, Git, Figma, Draw.io, Agile methodology, Swift Package Manager, GitHub Actions
