RECENT PROJECT EXPERIENCE

BookStore full stack web application

Orihuela Costa, Spain | **09/2023 – Current**

Full Stack Developer / Java, TypeScript, Spring Boot, ReactJS, Tailwindcss, PostgreSQL, Docker, AWS, Stripe

- Designed, structured and developed fully-functional real-world size full stack online book shop application to accumulate most of the technical stack and showcase within a portfolio;
- Created and implemented new reusable components, resulting in 25% reduction in development time and increased consistency across project structure;
- Optimized website performance by reducing assets sizes, implementing pagination etc. that lead to reducing pages load time by 40%;

Real Estate Agency landing website

Orihuela Costa, Spain | **05/2023 – 10/2023**

Front End Developer (Freelance) / JavaScript, ReactJS, CSS, HTML, Telegram API

- Established connection & work-flow with the customer and launched a Real Estate Agency landing page website from scratch, based on the customer requirements, assisted with improving design;
- Translated complex designs and frames into high-quality code, resulting in a 25% increase in website traffic and 15% increase in user engagement;
- Worked on troubleshooting and debugging to eliminate most of initial version production issues and improved overall functionality;
- Integrated interactive callback engaging forms and functionalities, resulting in 15% increase in lead generation;

Weather Sensor REST API and Client App

Orihuela Costa, Spain | **01/2023 – 04/2023**

Back End Developer / Java, Spring Framework, PostgreSQL, Rest template, XChart

- Implemented knowledge of Java and Spring Framework for completing a real-world technical task example;
- Built a SpringBoot REST API back end application that imitates a work of a weather sensor, stores measurements data in database and sends calculated data to Client application via HTTP by using rest template functionality;
- Added a few extra functionalities on top of the task and made application more user-friendly;

EDUCATION

Admiral Makarov State University of Maritime and Inland Shipping | Master's degree in engineering

- Saint-Petersburg, Russia: **09/2015 – 09/2020**

Languages: English (fluent), Spanish (elementary, currently learning) Russian (native)

Interests: Scuba diving (open water level certificate), Padel (paddle tennis, very popular in Spain), Guitar (learning to play), Calisthenics (to keep myself fit).

SOFT SKILLS

Within 4+ years of successful merchant navy sailing experience, I learned the best how to be **motivated and well organised**, to value time, **adopt to stressful situations** and **quickly learn** new information. In addition, gained valuable skills such as **contribution to team work** and cooperation, **establishing effective written and verbal communication** and **maintaining a healthy & friendly working atmosphere** among teammates, and will gladly use those skills in the future.
