Experience

2020 - 2023 Front End Developer Independent Projects

As a part of a development team implemented **responsive user interfaces** for a transport company's web portal using **React.js**, **Typescript** and **Material-UI** in order to enhance user experience for customers and business owners.

Worked on the development of an online planner application in collaboration with a senior developer. Developed various frontend components using **Bootstrap library** and integrated them with backend functionality.

Contributed to the design and development of a budgeting web application using **React and Material UI libraries**. Worked closely with a senior developer to create a responsive and user-friendly interface, reusable components, and implement API calls.

Worked on a project to develop a car dealership website using **React and Redux**. Collaborated with designers, developers and QA engineers.

Created a complex web mortgage calculator from scratch using **React** by translating a provided design into functional code. Worked in a team constantly collaborating with a manager and a QA engineer.

Created responsive mobile-first websites with semantic **HTML**, **CSS preprocessors**, **Block Element Modifier methodology**. Ensured websites are optimized for search engine ranking, and meet accessibility guidelines.

Developed movie ranking **Single Page Application using Model-View-Presenter pattern**, which allows users to rank, comment, sort and filter movies.

Developed a hotel booking **Single Page Application with React and Redux**. Utilized **Jest** to create unit tests and ensure the application functions properly

2012 - 2023 IT Consultant at Accenture

Conducted IT systems assessment, prepared comprehensive documentation, composed project requirements, negotiated design solutions and participated in testing of resulting applications. Additionally assisted with strategic planning, engaged in vendor relations.
