## SUMMARY

---

I'm a Senior Full Stack Developer (Tech Leader) with 15 years of experience in developing and maintaining web applications using modern technologies such as Angular, React, .Net, and SQL. Proven track record in improving user engagement by 25%, reducing deployment time by 30%, and optimizing web application performance. I'm fully engaged in leading the project with the possibility of mentoring developers resulting in a 20% improvement in team satisfaction and work quality. Adept at collaborating with cross-functional teams to optimize performance and maintain web applications.

## EXPERIENCE

---

### Senior Full Stack Web Developer (Tech Leader)

2008 – Present

*Infopulse*

*Kyiv, UA*

- Designed and implemented a new feature for the front-end and back-end part of the web applications
- Designed and implemented a RESTful API that improved web application performance
- Developed and maintained a salable microfrontends architecture, improving system
- Collaborated with a team of developers to refactor and improve the maintainability of an existing codebase
- Managed the software development life cycle for a major project

## PROJECTS

---

### Connect

April 2016 – Present

- Developed and implemented a new API, resulting in a 20% reduction in load times and a 25% increase in user engagement
- Optimized the performance of a web application using Angular, resulting in a 30% increase in page load times and a 20% decrease in bounce rates
- Managed the software development life cycle for the project, ensuring timely delivery and meeting all project milestones
- Collaborated with a team of developers to refactor and improve the maintainability of an existing codebase, resulting in a 30% reduction in bug-related delays and a 25% increase in overall code quality

### VMS-CS

July 2014 – April 2016

- Designed and implemented a RESTful API that improved web application performance by 30% and reduced average response time by 20%
- Developed and maintained automated deployment processes that reduced deployment time by 20% and minimized production issues by 25%
- Managed the software development life cycle for the project, ensuring timely delivery and meeting all project milestones

### OPC-Server

June 2012 – July 2014

- Developed and maintained architecture, improving system reliability by 20% and supporting a 20% increase in customer base
- Wrote clean, testable code with unit tests, resulting in a 30% reduction in bug-related delays and a 25% increase in overall code quality

## TECHNICAL SKILLS

---

**Languages:** JavaScript, Typescript, C#, Python, HTML/CSS, SQL

**Frameworks and Libraries:** Angular, React, .NET, Node.js, Jasmine.js, RxJs, NgRx, Karma.js

**Developer Tools:** Git, Docker, REST API, GraphQL, Redux, Postman, Visual Studio, VS code, CI/CD, Azure, SSMS, Unit test

## EDUCATION

---

**State Technological University**

*Bachelor of Computer Science*

*Zhytomyr, UA*

*2002 – 2007*
