Profile

Self-taught with an insatiable curiosity about how everything works under the hood. Committed to delivering impactful solutions with a keen eye for detail and continuous learning.

Work Experience

Radio Free Europe/Radio Liberty, Frontend Developer – Prague Apr 2023 – Present

[TypeScript, React, Redux, Apollo, GraphQL, Material UI, Jest]

- Reduced API code duplication by 31%, building a custom wrapper on top of fetch
- Migrated over 10 pages along with complex dialogs from the legacy ASPX to React
- Implemented GraphQL code generation to improve code reliability and prevent unexpected bugs
- Added dynamic permissions guard, resulting in less boilerplate for new pages
- Introduced a new Testing Library custom provider to increase Developer Experience inside a team

Praguelabs, Frontend Developer – Prague June 2022 – Mar 2023

[TypeScript, React, Redux, Next.js, Playwright, Jest, Docker]

- Achieved a 50% reduction in development and QA time for landing pages by building an internal component library through collaboration with designers
- Improved PageSpeed Insights performance by 20%, reviewing dependencies, analysing the performance tab, and other techniques
- Brought over 30 Playwright E2E tests and covered the crucial functionality of the Campiri project
- Implemented a custom embeds widget for the WYSIWYG editor to prevent XSS and malicious iframes
- Developed a chat between renter and RV owner with the possibility for admin to join on request

Dalyoko, Frontend Developer – Remote Dec 2021 – June 2022

[TypeScript, React, Apollo, GraphQL, Jest, Hugo]

- Led a small team of 3 junior developers while maintaining direct client communication
- Increased unit test coverage by 40% using Jest and Enzyme
- Created a template for React and Hugo integration, implementing an island architecture
- Analysed and refactored legacy multi-step forms using state machines
- Wrote GitLab CI/CD pipelines to automate deployments

Skills

Languages: JavaScript, Typescript

Technologies: React, Next.js, Redux, Apollo, GraphQL, Jest, Node.js, Docker, Git, HTML, CSS

Visa requirements

Need UK visa sponsorship for legal work authorisation.
