---

### SKILLS

C#   ASP.Net   Azure   Git   JS   SQL   Debugging  
Time-management   Team-player

---

### EDUCATION

**M.A. – Fundamental Informatics and Information Technologies** 2018–2020  
SFEDU, Rostov-on-Don, Russia

**B.A. – Applied Mathematics and Computer Science** 2014–2018  
SFEDU, Rostov-on-Don, Russia

---

### WORK EXPERIENCE

**Software engineer** August 2019 – June 2022  
**SimpleCode (IT Services)**  
Rostov-on-Don, Russia

Project: **Nerdio** – management platform for Microsoft Azure services

*Achievements and tasks:*

- *Significantly increased the amount of project clients by developing (with a team) conceptually new, easily extensible application with similar to old functionality using emerging technologies. Worked on user forms with input validation (100% programmatic), custom UI components, and data exchange with backend using REST*
  - *Reduced successfully developing time and the number of errors up to zero by fully performing business tasks, including front-end (ReactJS), back-end (C#) and database (MS SQL) parts*
  - *Made available product API for external use to expand the range of potential users by building Rest API for major product functions with Swagger and programmatic input data validation*
  - *Decreased the number of errors related to authorization to zero by implementing a secure application model to project with many Powershell scripts*
-
