## EDUCATION

---

### BMSTU

*Bachelor of Computer Science. Spec - Software Engineer*

Moscow, Russia

Sep. 2019 – May 2023

## EXPERIENCE

---

### Freelance Python Software Engineer

01/2023 – Present

- Development of online stores with cart system
- Development of parsers using Python
- Improvement of existing projects of customers
- Development of website with integration of ChatGPT(Flask)

### Python Full-Stack Software Engineer

Jul. 2022 – Jan. 2023

*Formula of Wheel*

*Moscow, Russia*

- Development of the functionality of a personal account, the function of passing tests on the topics of traffic rules.  
Development of responsive front-end
- Software architecture and database design using PostgreSQL
- Setting up nginx and deploy of project using docker
- Development of desing

### Python Full-Stack Software Engineer

Feb. 2022 – June 2022

*ITRON*

*Moscow, Russia*

- Creating flowcharts and drawing up technical documentation
- Development of logic and algorithms
- Setting up nginx and deploy of project using docker
- Components testing and writing Test Cases.
- Architecture development and database design using MySQL

### Python back-end software engineer

Nov. 2020 – Jan. 2022

*MTSOSI BMSTU*

*Moscow, Russia*

- Development of parsers to facilitate the scheduling of university classes
- Team development of a student attendance and academic performance accounting system using Django
- Development of an information system for students with a schedule of classes and a map of classrooms
- Assistance in the development and commissioning of a system for distance learning of students during quarantine

## PROJECTS

---

### Fermath's Last Theorem | *Python, Django, Bootstrap, Numpy, AJAX*

Sep. 2022 – May 2023

- Developed the functionality of the user's personal account with the ability to view test results
- Developed pages with theoretical material on numerical methods with separation of roles
- Developed calculators for numerical methods to solve mathematical problems with user input using AJAX

### Waiter's friend | *Python, Django, Vue, PostgreSQL, Celery, RabbitMQ, Docker*

June 2023 – Present

- Developed software architecture, wrote technical documentation and developed database architecture
- Developed a functionality for working with a database for waiters with differentiation of rights between users
- Made a convenient user interface with the display of restaurant tables and waiters who serve the table
- Made a convenient system for placing an order and paying from a banking application using a qr code

## TECHNICAL SKILLS

---

**Languages:** Python, Java, C, C++, SQL, JavaScript, HTML/CSS,

**Frameworks:** Django, React, Flask, Spring, DRF, Bootstrap

**Developer Tools:** Git, Docker, NGINX, Putty, Visual Studio Code

**Libraries:** Numpy, pandas
