## SUMMARY

---

Frontend developer with over 6 years of experience, currently working and living in Yerevan. I'm developing towards backend, I plan to grow into a teamleader.

I like working with people, I enjoy taking on communication with colleagues, mentoring and leadership in certain issues. I have worked in big fintech companies, and I know what it means to implement scrum and work out a project from scratch.

I like to take active part in development, build processes, mentoring. I like studying English, algorithms and backend development, and all sorts of self-development.

I want to be able to influence the processes inside the team, not just write tons of code.

## EDUCATION

---

### Voronezh State Technical University

*Specialist degree, Information technology in education*

Voronezh, Russia

Sep. 2010 – July 2015

## EXPERIENCE

---

### JavaScript Teacher

*Elbrus Coding Bootcamp*

July 2022 – Present

*Moscow, Russia*

- In almost a year of teaching, I graduated four groups of students (about 80 people), 90% of whom found a job after graduation.

### Senior Frontend Developer

*Mission:Luna*

Jan. 2022 – July 2022

*Moscow, Russia*

- Acted as a liaison, using communication skills to remove bottlenecks in interactions between teams. As a result, I accelerated our decision-making processes and product cycle by about 30%.

### Senior Frontend Developer

*Infourok*

Oct. 2021 – Dec. 2021

*Moscow, Russia*

- Participated in the development of the project roadmap, began to implement the project logging and analytics of user actions. Left due to downsizing.

### Senior Frontend Developer

*VTB Bank*

June 2020 – Oct. 2021

*Moscow, Russia*

- Supported three projects simultaneously. Introduced into the codebase a gathering of custom metrics, increased test coverage from 83% to 92%.

### Frontend Developer

*Sberbank*

Oct. 2019 – July 2020

*Moscow, Russia*

- Coming to the project as the only junior developer, in 10 months: implemented Scrum, cleaned up the code base of several projects, and developed one project from scratch to release. Trained one intern.

### Junior Frontend Developer

*Neoflex*

July 2018 – Oct. 2019

*Voronezh, Russia*

- UI-Kit development for internal projects, credit pipeline development for VTB Bank, code support and maintenance, code coverage by tests, bug fixing.
