

## SUMMARY

---

Experienced Web Developer with 5 years of experience developing high-quality websites and applications. Proficient in JavaScript, React, Angular, HTML, CSS and other modern frontend technologies. Adept at translating design concepts into responsive and user-friendly applications, optimizing performance, and providing technical leadership. Skilled in UX/UI design and ensuring cross-browser compatibility. Experienced in working with the Agile methodology.

## SKILLS

---

**Programming Languages:** JavaScript, TypeScript, Java, Python

**Frameworks and Technologies:** React, Angular, GraphQL, AJAX, Node.js, Git, UX/UI, RESTful APIs, HTML, CSS

## WORK EXPERIENCE

---

### SBERBANK

*Software Engineer*

*August 2021 – September 2023*

- Developed a cross-browser and user-friendly web application that received a 4.8/5-star rating in the company's app store.
- Created a custom UI library, reducing development costs by 30% through component reuse.
- Migrated the old version of the web application to a new architecture, resulting in a 70% acceleration of the development process.
- Reduced server response time by 20% by integrating the web application with SAP system databases.
- Fixed a critical vulnerability in the web application by creating a middleware layer and parsing tokens between the frontend and backend.
- Close collaboration with designers and stakeholders enabled the implementation of new features with minimal bugs, resulting in a CSI score increase to 98%.
- Organized the documentation database, resulting in a 40% reduction in the support team's workload for product maintenance.
- Conducted demo presentations for key stakeholders and product owners, thereby facilitating the timely integration of critical changes into the project, contributing to the successful delivery of high-quality solutions.

### BIG CITY PRODUCTION

*Jr. Software Engineer*

*May 2019 – August 2021*

- Increased music equipment sales by 25% through the development of an adaptive online store with a user-friendly interface.
- Introduced sales automation by integrating the website with the CRM system, which simplified customer relationship management and improved sales processes, resulting in a 25% increase in sales.
- Increased conversion rate by 10% by creating an adaptive version of the website for mobile devices and tablets.
- Collaborated closely with the senior development team to handle commercial tasks, which helped reduce the workload on the team by up to 20%.
- Delivered comprehensive technical support and administered websites, overseeing hosting management, server configurations, and the establishment of a robust corporate email system that ensured seamless communication.
- Conducted comprehensive website testing to identify bugs and find ways to improve the user experience.

## EDUCATION

---

### Moscow State University of Transport

*Bachelor's Degree in Construction (Real Estate Development)*

*September 2017 – June 2022*

### School 21

*Bootcamp - Computer Science (Full Stack Development)*

*June 2019 – August 2021*

## ACTIVITIES

---

**Volunteer Work:** Green Marathon 2023 (All registration fees of participants will be directed to planting trees).
