## Summary

---

Backend/Full-stack developer with 3+ years of experience in distributed systems and microservices. Hands-on experience in developing APIs, services, databases and interface elements. Seeking a challenging backend/full-stack developer position where I can leverage my skills and experience to drive results and contribute to the organization's success.

## Experience

---

### LogoSoft LLC | Moscow, Moscow

#### Backend Developer | 10/2021 - Present

SaaS project with microservices, stack: PHP(Symfony), JS(React), PostgreSQL, OpenAPI, Docker, RabbitMQ, Nginx, Elasticsearch

- Developed more than 50 API endpoints for a logistics service and its mobile app
- Elasticsearch integration
- Implemented the calculation of the amount for transportation services with 80 different metrics
- Optimized the search query for a table with 40 million records by removing subqueries, having and setting indexes for filtering fields, increased processing speed by 4

### THE ICE (NYSE) | New York, New York

#### Full Stack Developer | 10/2021 - 04/2022

I had an amazing teamwork experience at this job. Conducted presentations of new product features developed by me for business representatives. Worked on remote:

- Refinement and refactoring of UI elements on React
- Refactored 30 000 lines of legacy Zend code
- Reduced the user's waiting time for a search request by 25%

### Rostov-on-Don, Rostovskaya obl

#### Junior Full Stack Developer | 12/2019 - 10/2021

- Hospital API Integration to Implement Online Patient Service using PHP 7.4 (Symfony 4)
- Legacy code upgrade from PHP 5 to PHP 7.4
- Payment system integration <https://yookassa.ru/>
- File generation services using open source libraries (PDF, .xlsx, .csv)

## Skills

---

Responsibility, Teamwork, Agile, HTML, MySQL, PostgreSQL, PHP, JavaScript, Linux-Apache-MySQL-PHP Stack, Jira, ReactJS

## Education

---

### Donetsk National Technical University | Donetsk, Donetsk obl

#### Master's Degree Systems software | 07/2013
