- Bootstrap
- Node.js / Express.js

DATABASES:
- MongoDB

TOOLS & PLATFORMS:
- Git
- Visual Studio Code (VS Code)

EDUCATION & TRAINING

FreeCodeCamp
- Responsive Web Design Certification
- JavaScript Algorithms and Data Structures Certification

Coursera
- Technical Support Fundamentals (Google)

Udemy
- The Complete 2020 Web Development Bootcamp

St. Petersburg State University of Culture and Arts

Museum Studies (2009)

MY PROJECTS

CARRIER APP:

carriers-app.herokuapp.com/

- Transformed a hard copy list of over 250 names of carriers into a web app that significantly speeded up workplace routine processes in my current job
- The app allows a quick search just by entering a few letters of a carrier's name, in case missing in the database, it allows entering a new name into the database, while its ordinal number is being assigned automatically
- Developed app using React.js, React-Bootstrap, Sass, Axios for the frontend part
- Built REST service using Node.js, Express.js, and MongoDB from scratch for the backend part of the application

ONLINE ZOO:

https://rolling-scopes.github.io/linggos06-JSFE2021Q1/online-zoo/pages/

- You can observe animals from around the world (zoological farms, rehabilitation centers, zoos) online in live streaming and get some interesting facts about every animal
- App has a nice vivid design making users associate with the natural environment to grab the users attention
- Applied technologies: HTML, CSS, JavaScript;

KEEPER-APP:

https://github.com/Linggos06/keeper_app

- Created a note-taking service for writing down notes, jotting down quick thoughts, brainstorm ideas, etc.
- Built app by using React.js and Material-UI React library

LANGUAGES

- **Russian - Native**
- **Turkish - Upper-Intermediate**
- **English - Intermediate**

INTERESTS

- **Exploring new places**
- **Riding bicycle**
- **Dogs**
- **Reading**
