I'm a junior data analyst with half a year of professional experience. My background is in law but I always been interested in working with data, so I decided to make the transition to analytics. So I took a training course in data analytics and science and joined IT company as a junior data analyst where I gained hands-on experience with data analysis, statistical analysis and BI tools. I've been responsible for analyzing data using Excel and SQL, as well as creating reports to communicate my findings to the team. I'm also proficient in Python, and I'm always looking to expand my skillset.
