Habrabro ⭕

An iOS developer experienced in developing a cloud storage app for a service with an audience of 23 million monthly users, creating a mobile SDK from scratch for the top-3 business messenger worldwide by the number of users, and working on a forex broker platform with more than 2 million traders. I am committed not only to writing clean and maintainable code, fully covered by tests, but also to enhancing project metrics related to features I'm working on.

💪 Skills

App modularization, Auto Layout, CocoaPods, Combine, Core Animation, DRY, Figma, Firebase, GCD, git, GitFlow, Keychain, KISS, MVC, MVVM, Objective-C, OOP, Realm, RxSwift, SnapKit, SOLID, SPM, Storyboard, Swift, SwiftGen, SwiftLint, SwiftUI, Tuist, UDF, UI testing, UIKit, unit testing, XcodeGen, XCTest.

💼 Employment

VK / iOS Engineer (Cloud – AppStore top-3 cloud storage app in its domestic region, Mail.ru – AppStore top-1 email client superapp in its domestic region).
May 2022 – Dec 2023

- Reduced time-to-market **by 30%** for new features related to file viewing by implementing a new file viewer module in Cloud app. Made the module remotely configurable and reusable for other teams.
- Decreased the number of user billing profile loading failures **by 83%** through refactoring billing profile handling logic and rewriting it from Objective-C to Swift in Cloud. Increased the domain code test coverage **by 96%**.
- Designed and developed a cross-app feature that allows users to open email attachments from the email client superapp inside the cloud storage app.
- Regularly participated in the company's internal tech talks as a speaker. Presented "Switching from RxSwift to Combine in a project" and "Swift compiler performance" tech talks.

JivoChat / iOS Engineer (top-3 business messenger worldwide by the number of users).
Aug 2020 – May 2022

- Developed a mobile SDK from scratch for audience of **200K+ clients**.
- Implemented **3 APIs** for the SDK – Swift, Objective-C, and JavaScript (ReactNative); supported **6 major iOS versions**; supported all the future Xcode versions by adding module stability support for the SDK binary.
- Wrote complete documentation of **55K+ characters** for the SDK.
- Was directly communicating with **15 clients' development teams** at once, solving the SDK integration issues, collecting feedback, and improving the product based on that.

Appricot / iOS Developer (app for a forex broker platform with more than 2 million traders).
Aug 2019 – Aug 2020

- Increased user proof of identity/residence completion rate **by 13%** through implementation of a new identity and residence verification flow.
- Rate of user conversion to funded account holders was increased **by 14%** with implementation of demo account creation flow.
- Increased users onboarding completion rate **by 11%** after implementing a new onboarding flow.
- Developed country/region-specific features. As an example, added RTL UI direction support for the whole app.

🎓 Education

Volgograd State Technical University.
Sep 2016 – Jul 2020

- Bachelor's degree in Applied Computer Science.
- Graduated with honors.
- Graduation project: a mobile app that helps to prepare for the post-school Unified State Exam.
