SUMMARY

Software engineer with 6+ years of designing and building web and mobile applications. Specialized in frontend development using modern frameworks and libraries like React, Vue, and Angular. Have extensive experience in starting apps from scratch as well as supporting and further developing existing projects. Looking for a senior frontend developer role, interested in solving complex technical problems in various domains and evolving as a full-stack engineer.

EXPERIENCE

Lead Frontend Developer   May 2020 – Present
Freedom Finance Investment Company   *Moscow, Russia*
- Improved trading terminal frontend architecture by combining separated modules into a mono repository for better developer experience and reducing feature delivery time
- Developed applications for internal use such as corporate portal, client support, and back office which are essential to the company's business and help to address customers' and employees' needs
- Built a small team of frontend developers, mentoring, and growing teammates from junior to middle level

Senior Frontend Developer   Nov 2017 – May 2020
Banki.ru (Russian financial marketplace)   *Moscow, Russia*
- Implemented UI for a new trip abroad section that allows clients to purchase an insurance policy in a few clicks
- Designed insurance salesman dashboard that helps car owners to find offers with lower fees
- Optimized webpack build, reduced frontend bundle size and total building time

Frontend/Mobile Developer   Aug 2016 – Oct 2017
Webox LLC (Khana2Go food ordering and delivery app)   *St Louis, MO, USA*
- Created the hybrid mobile application using PhoneGap/Cordova that reduced the cost of cross-platform development
- Imitated native mobile apps behaviour (responsiveness, smooth transitions and animations) using Framework7 library for better user experience
- Minimized server load and building/loading time by excluding 3rd party libraries from the resulting bundle and loading via CDN

SIDE PROJECTS

MedAdvisor   Jan 2021 – Present

MedAdvisor is a startup that aggregates healthcare services across Russia and helps patients find clinics based on ratings, reviews and location. My role here is to design a frontend architecture for the whole site and implement the user interface according to design mockups.

JOOR.me   Feb 2016 – Apr 2018

Publishing service for online magazines. The main challenge in this project was to implement a user-friendly UI for creating magazine issues, including a Photoshop-like graphic editor (HTML5 Canvas, Fabric.js) for covers and a feature-rich text editor (React, Draft.js) for articles.

TECHNICAL SKILLS

Programming languages: JavaScript, TypeScript, HTML/CSS
Frameworks: React/Redux, React Native, Vue, Angular
Styling: SASS, LESS, Stylus, PostCSS, BEM
Testing: Jest, Mocha, Chai, Sinon, Puppeteer
Developer Tools: Node.js, Webpack, Babel, Eslint, Lerna, Docker
Libraries: Redux Saga, Redux Thunk, Redux Form, Apollo GraphQL, RxJS, Material-UI, jQuery

EDUCATION

Far Eastern Federal University   Vladivostok, Russia
Master's degree in Financial Management
