ABOUT

Frontend developer with **5+ years** of commercial experience, working in teams ranging from 2 to 40 members, which allows me to have an understanding of the whole development cycle, including teamwork that took place according to scrum/agile methodologies, always trying to be autonomous, responsible, and take ownership of what I take on. Expert in react development, creating UI interfaces and functionality, and optimizing for application flexibility and extensibility.

In addition, besides my main stack, I also like to follow new front-end libraries and technologies. My hobby is participating in various hackathons. I have also been trying to contribute to Open Source.
