Natalia Toropova

Frontend Developer (React/Next)

PROFILE

Hello, I am Natalia Toropova, a Frontend Developer with 1 year of work experience. About 2 years ago I fell in love with Frontend and started making different pet projects: E-commerce apps, real-time chat, todo apps, weather apps, etc. It was a very interesting experience for me, so I decided to become a Frontend Developer. To this moment I worked in 3 different companies and gained a lot of new skills.
